Summary

A web developer who has experience in **Frontend** and exploring **Backend** technologies also has interest in the fields of cloud computing and IoT.

Education

Pandit Deendayal Energy University, B.Tech in Information and Communication Technology Oct 2022 – July 2026

- CGPA: 9.12/10

Projects

Mindmaps

Github

- A cutting-edge platform with 26+ active users for note-taking and chatting.
- Allows users to create, manage, and organize tasks with color-coded notes. It also features advanced filtering options for quick access based on title, color, or user-specific preferences.
- Users can send friend requests to others, and once accepted, both users become friends and can engage in real-time chat.
- Tools Used:
 - **NextJS**: To create a fast and dynamic frontend with seamless user experience.
 - **ExpressJS**: To build a secure and efficient backend API for handling server-side operations.
 - **MongoDB**: To store user data, notes, friend requests, and chat messages in a scalable database.
 - **Clerk**: For seamless and secure user authentication and session management.
 - **Socket.IO**: To enable real-time communication for chat and instant notifications.

Chrome Startup Page

Github

- A unique, reimagined landing page inspired by Google's minimalist design, providing a sleek and focused user experience.
- Built with a strong focus on SEO, enhancing visibility, search engine rankings and smooth navigation.
- Tools Used:
 - **ReactJS**: To build a dynamic and interactive user interface, enhancing the user experience.
 - **SCSS**: For efficient styling and creating reusable, responsive layouts.
